

# Pedestrian

(Model PED)

“Sit and Stand” Pedestrian versions of the popular Hybrid II 50th Percentile Male, Hybrid III 50th Percentile Male, Hybrid III 95th Percentile Large Male and the Hybrid III 5th Percentile Small Female are available. Because of their unique design, Pedestrian ATDs have a varied range of applications including assessment of vehicle component interaction and vehicle contact points. These dummies are complete and certified with all standard upper torso calibration (according to model), allowing for head and thorax injury assessment. The Pedestrian series of ATDs are equipped with a straight lumbar spine, a modified pelvic structure and knee slider replacements.

### Hybrid III Pedestrian Includes:

- Chest Deflection Transducer
- Six-Axis Neck Transducer Structural Replacement
- Accelerometer Mountings for Head, Chest, and Pelvis.\*

### Hybrid II Pedestrian Includes:

- Accelerometer Mounts for the Head and Chest.\*

\*User must specify the accelerometer manufacturer and type at time of order placement

*Other instrumentation available but not included*

### Hybrid III 50th Pedestrian Components.

78051-60P	Pelvis (Pedestrian)
78051-41P	Hip Flesh, Left
78051-42P	Hip Flesh, Right
78051-53P	Lumbar Spine Bracket
78051-88P	Lumbar to Thoracic Adaptor
78051-66P	Lumbar Spine
78051-24P	(2) Knee Slider Replacement, Inboard
78051-25P	(2) Knee Slider Replacement, Outboard
