

Power Pull Assembly with Digital Angle Display and Electronic Inclinometer

Model Number TF-490-1002

INTRODUCTION

Denton ATD, Inc. offers a Power Pull Assembly with Digital Angle Display and Electronic Inclinometer designed to raise calibration test stand impact probes and pendulums to the prescribed drop height for each test dummy's specific test requirements. This product is ideal for use with the TF-200 Neck Pendulum and the TF-1602-1000 Foot Impactor Test Stands. The Assembly is available in a 115VAC \pm 10% 50/60HZ version (TF-490-1002-110) or a 230VAC \pm 10%50/60HZ (TF-490-1002-220) version. The 220VAC version has the CE Mark.
