

Release Mechanism Assembly

Model Number TF-490-1200

INTRODUCTION

Denton ATD, Inc. offers a Release Mechanism Assembly designed to release calibration test stand impact probes and pendulums for each test dummy's specific test requirements. The Release Mechanism Assembly is ideal for use with the TF-200 Neck Pendulum and the TF-300 Thorax Impact Test Stands. The Assembly is available in a 110VAC+/-15% 50/60HZ version (TF-490-1200-110) or a 220VAC+/-15%50/60HZ (TF-490-1200-220) version. The 220VAC version has the CE Mark.
